Welcome

Cygnnet was established in 1988. Since then we have developed a wide range of health care services for young people and adults with mental health needs, acquired brain injuries, eating disorders, autism and learning disabilities within the UK. We have built a reputation for delivering pioneering services and outstanding outcomes for the individuals in our care.

Our expert and highly dedicated care team of 11,500 employees support 7,500 individuals across 150 services to consistently make a positive difference to their lives.

Cygnnet Health Care is part of the Cygnnet Group which also provides social care services for adults in England, Scotland and Wales.

Introduction

Cygnet has over 20 years' experience of delivering the best outcomes for individuals with autism and learning disabilities, who may present with behaviours that challenge. We offer services across 5 different locations in the UK.

Alongside our interventions to reduce maladaptive behaviours, our aim is to help the individuals we support to develop life skills and progress through their care pathway to achieve further independence.

STOMP

Cygnet supports STOMP and has committed to the STOMP pledge **Stopping the over-medication of adults and young people with a learning disability, autism or both.**

Our service user profile:

- Primary diagnosis of autism and associated learning disability and / or mental health needs
- May present with behaviours that challenge
- Communication challenges
- Forensic history
- Likely a history of multiple exclusions and placement or family breakdowns
- May have an EHCP (Education, Health & Care Plan)
- May be subject to DoLS (Deprivation of Liberty Safeguards) or Care orders
- May be detained under the Mental Health Act (1983)
- Require bespoke support and care

Our myPath care model

To ensure we cater for each person's journey and achieve long-term results, we have created a unique approach to care for individuals with autism spectrum disorders.

myPath is our overarching care model that monitors service user engagement levels, manages their records, assesses their progress and formulates a personalised and dynamic care plan with measurable targets. The model embraces a wide range of evidence-based tools such as pharmaceutical inputs, daily living skills, progressive community-based outcomes and risk management plans. In doing the above, **myPath** ensures the delivery of high quality and inclusive care that is continually evaluated through robust operational and clinical governance frameworks.

myPath is tried and trusted and delivers industry-leading results.

Our Model of Care - Hospitals

At Cygnet Health Care we are doing all we can to make a **positive difference**.

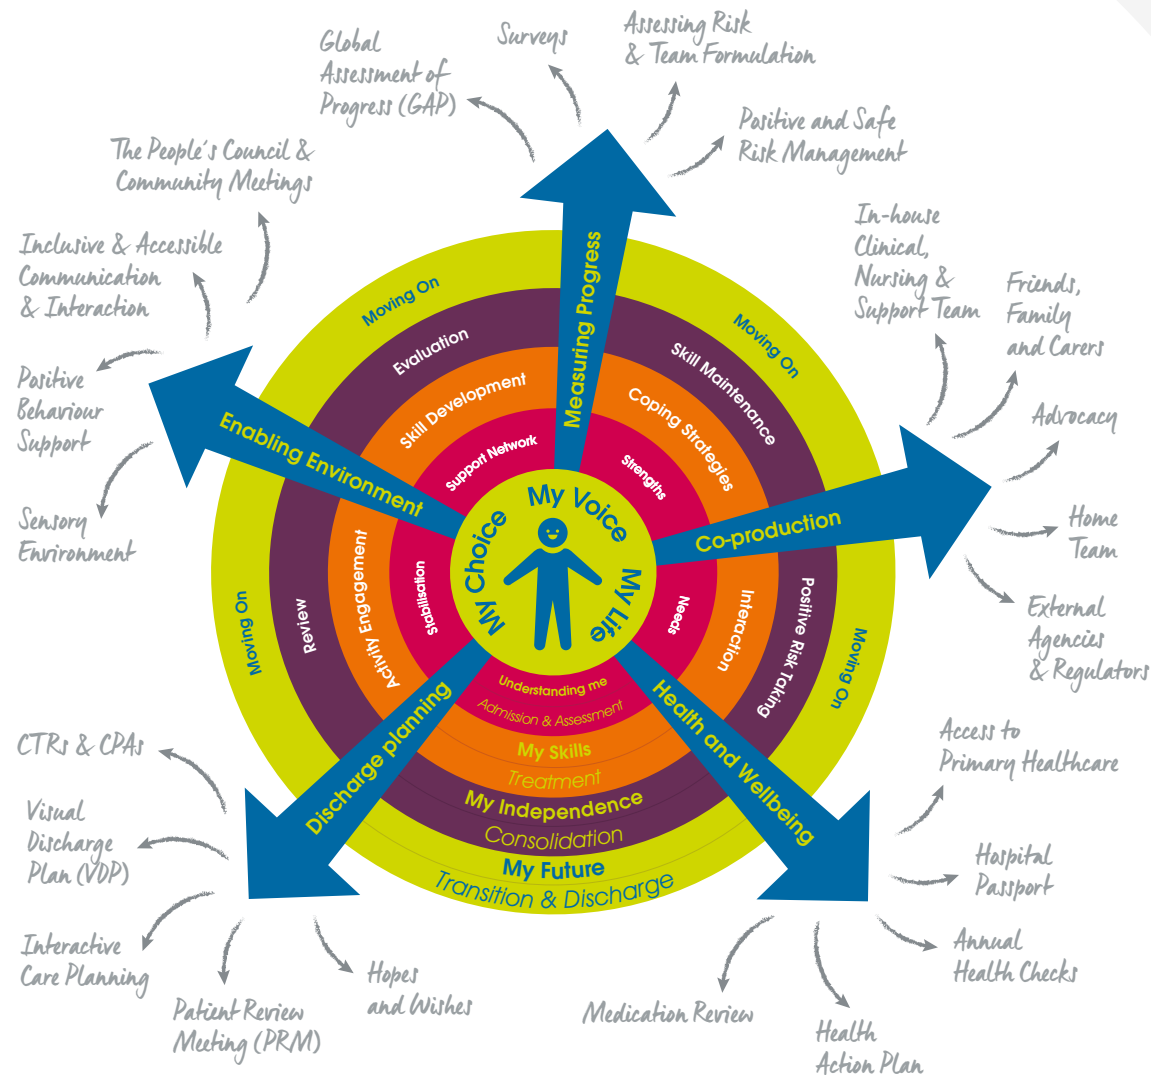

To help everyone work together to achieve this we have collaboratively created **Our Model of Care for our Autism Spectrum Disorder Services**.

We adopt a values based, social model of disability with **My Choice, My Voice, My Life** sitting at the heart of our model, empowering care, support and treatment to be provided through the lens of any individual.

Cygnet Hospital Colchester, Essex

Boxted Road, Mile End, Colchester, Essex, East CO4 5HF

Highly Specialised Autism Spectrum Disorder

18+ years

Male

9 beds in 2 wards

Cygnet Hospital Colchester supports individuals with autism, learning disabilities and complex needs. The team also supports individuals who are detained under the Mental Health Act, as well as those who have complex behaviours, or who have significant difficulties with social engagement.

Larch Court offers placements for four men with independent living areas. The living areas include self-modulation sensory facilities, with a programmable sensory menu to accommodate personal preferences, strengths and abilities of each individual.

Chestnut Court benefits from five independent living areas. Each flat offers a robust environment designed to provide a safe space for individuals who may exhibit behaviours of distress or have specific sensory needs. Each room has been personalised to accommodate preferences, strengths and abilities of each service user.

Larch Court and Chestnut Court focus on enabling individuals to achieve three key targeted outcomes:

- Reduction in behaviours that challenge
- Increase in pro-social presentation
- Progress to future out of hospital placements within lesser restrictive environments

Our facilities:

- En-suite bedrooms
- Extensive communal areas including lounge and dining room
- Activities of daily living kitchen and laundry service
- Quiet room
- Sensory room
- Large garden
- Multi-faith room
- Gym
- Activity centre
- IT room

Our **dedicated physical health nurse** works closely with GP's, dentist's and other external agencies

21 beds (8 en-suite bedrooms + 13 single occupancy flats)

Cygnet West Hills has recently undergone extensive refurbishment to improve the environment for the individuals we support and allow them more opportunities to progress through their care pathway towards greater independence.

In line with 'building the right support', we support individuals who have different levels of need in their own space which is tailored to their own sensory needs.

- 8 en-suite bedrooms and 3 bespoke single occupancy flats in the main house
- 3 bespoke single occupancy flats in the courtyard that is attached to the main house
- 4 bespoke single occupancy flats in the Annexe
- 3 bespoke single occupancy flats in the Gate Lodge

Located in Kings Norton, Birmingham, Cygnet West Hills provides support for 21 individuals with autism, learning disabilities and complex needs. The team can also support individuals who may be detained under the Mental Health Act, as well as those who have complex behaviours, or who have significant difficulties with social engagement. We accept emergency referrals and the team is experienced in managing them quickly and efficiently to ensure the transition for the individual is as smooth as possible.

Each service user has their own en-suite bedroom or single occupancy flat that they are encouraged and supported to personalise. The service has an array of facilities, all of which provide a low stimulus environment for individuals who may be experiencing heightened feelings of agitation, including many good sized living areas for service users to choose from, sensory rooms, activity rooms and 3 activity of daily living (ADL) kitchens where individuals are supported to make their own drinks and prepare food.

The highly experienced team work together with service users to provide a holistic, person-centred, comprehensive assessment and care and treatment plan. They ensure individual needs are met in a way that helps achieve stability and discharge to a less restrictive setting. All members of staff are trained in understanding autism and learning disabilities and in how to create a supportive environment for everyone.

On-site multi-disciplinary team

(consisting of nurses, occupational therapy, speech and language therapy, psychologists and psychiatrists)

13 single occupancy flats providing different levels of support for individuals with different levels of need

Cygnet Adarna House, West Yorkshire

279 Beacon Road, Wibsey, Bradford, West Yorkshire BD6 3DQ

Mental Health and Autism

18+ years

Male

9 Beds

Cygnet Adarna House is our service for men with mental illness and a secondary diagnosis of autism spectrum disorder (ASD). Supporting 9 men, we provide a homely and community facing environment for individuals who are preparing for community life, but need further support to move to more independent living.

This service has been created as a step-down service from Adarna Ward at Cygnet Hospital Wyke in Bradford. This enables individuals to continue to work on their independent living skills while being in a safe environment – with the advantage of continuing access to the same multi-disciplinary team (MDT). The service also accepts external referrals.

The MDT work together with each individual to provide a holistic, person-centred, comprehensive assessment and care and treatment plan. The team will ensure individual's needs are met in a way that helps achieve stability and discharge to a less restrictive setting.

Cygnet Adarna House is located in the suburbs of Wibsey in Bradford and the team will focus on ensuring the individuals they support are part of their local community and can access education, employment and other opportunities to meet their needs. The service also benefits from great public transport links to local towns and cities including Bradford, Huddersfield, Leeds and Manchester.

We can also support men who are not actively showing signs of immediate risk, but who may need to develop their independent living skills, or require support with their mental health needs. Service users are supported to be actively involved in their own rehabilitation.

The team are highly experienced in supporting individuals with ASD. All members of staff are trained in understanding ASD and in how to create a supportive environment for everyone. The service has an array of facilities, all of which provide a low stimulus environment for individuals who may be experiencing heightened feelings of agitation.

Full MDT shared with Adarna Ward at Cygnet Hospital Wyke to provide continuity of care as individuals move along their care pathway

Bespoke staff training packages tailored to the service

Providing a specialist care pathway route through hospital into the community

Service users were consulted by the estates team to decide on colour themes and decoration at the new service

Homely environment with 24/7 support

Focus on reducing restrictive practice

In-house therapeutic earnings programme

Male

24 beds

Springs Service at Cygnet Hospital Harrow supports men with mental health needs and autism. Our person-centred, positive behavioural support focus seeks to reduce behaviours that challenge and treat mental health symptoms. We develop independent living skills and social intergration. The aim of the service is to support individuals by giving them the tools that they need to be discharged into the community.

At Springs Service, we provide a care pathway to support individuals to move on to supported living, a community placement, or return to their home. We have distinct living areas to allow each person to receive the level of support they need to prepare for the next step along their journey.

Our team are highly experienced, with all staff members trained in understanding autism, mental health conditions, and in creating a supportive environment for everyone. The multi-disciplinary team (MDT) work together with individuals to provide a holistic, person-centred, comprehensive assessment and care plan. The MDT ensures everyone's needs are met in a way that helps achieve stability and discharge to the least restrictive setting.

On-site full-time fitness instructor

Access to further education at Harrow College

Tuck shop
ran by service users, enabling skill such as social inclusion, budgeting and finances

Involving family and carers as much as possible (where appropriate)

Focussed on reducing restrictive practice

"It is so nice to have an entire team care so much about my son's future. I feel genuinely listened to and know he is in good hands."

15 beds

A **adarna Ward is a 15 bed service at Cygnet Hospital Wyke, for men with mental illness and a secondary diagnosis of autism spectrum disorder (ASD), we also take individuals who haven't been formally diagnosed with ASD, but who have a high clinical suspicion. Most service users we support, also present with behaviours that challenge.**

The focus of the service is on recovery through meaningful engagement both within the service and in the local community. Our aim is to support individuals to live with their condition and to discharge them onto the least restrictive setting suitable for them.

The multi-disciplinary team (MDT) work together with the people we support to provide holistic person-centred assessments and care plans. The psychology team, using models of dialectical behaviour therapy (DBT) and adapted cognitive behavioural therapy (CBT), work in groups or individual sessions depending on the need of the individual. They will work with them to understand their goals for treatment. The team support individuals to build their confidence in understanding, managing and regulating their emotions and then helping them to develop coping skills that will aid their rehabilitation. The occupational therapy team provides sensory integration therapy, sensory assessments and has established links in with the local community, including various autism friendly community groups. Our speech and language therapy support individuals to understand their communication needs and making adaptations where necessary.

We ensure that we provide high quality care to our the people we support as well as their families and carers. With the right support, our individuals are able to live a more fulfilling life.

The ward is set in a spacious environment with a large open communal lounge area, an enclosed courtyard and five additional communal areas including a sensory room, IT suite, and therapy kitchen, providing lots of space for service users. There is also a de-stimulation suite to provide a low stimulus environment for individuals who may be experiencing heightened feelings of agitation.

“Very happy with the progress the individuals have made. Sending them to Adarna Ward was the best decision for them.” External Professional

Individuals supported to gain **independence in their daily living skills**

Jim's history

Jim is a 19-year-old man with a diagnosis of autism, mild learning disabilities, and hyperkinetic conduct disorder. He has a background history of illicit drug use and involvement with gangs.

Jim struggled in the past following his parents' separation and his father moving out of the family home. He found this hard to understand and process emotionally as predisposed by his diagnosis of Autism. This led to him displaying challenging behaviour as a way to communicate his needs and frustrations.

In the community, Jim was heavily involved in illegal activity, which led to him being prosecuted and detained at a Secure Training Centre (STC).

When he came to us

Initially, Jim's admission to the Springs Service at Cygnet Hospital Harrow was seen as negative to him. He felt like he did not have a mental health condition and was unfairly detained against his will.

He subsequently went through a short period of aggressive outbursts that led to seclusion and being placed on one-to-one enhanced observations.

Jim's care

After a couple of months within the Springs Service, Jim was able to build trusting relationships with his peers and professionals. He also started to enjoy spending time positively in communal areas.

He engaged well in treatment interventions, such as Psychology, and was able to be open and transparent about his thoughts and beliefs. He came to understand that he could be vulnerable, which is what led him previously being recruited to join a gang and being peer-pressured to engage in criminal activity.

Due to Jim engaging in psycho-education around gangs using an adapted Cognitive Behavioural Therapy (CBT) approach, he came to gain insight into the dangers and consequences of being in a gang.

From this intervention, he came to understand there was a clear distinction between his positive and negative peer groups. The positive peer group would provide good guidance to motivate him to not engage in criminal activities and violence.

Jim also enjoyed occupying his time with other activities such as music, cooking, and watching TV programmes, in the social spaces. Jim continued to progress through his care pathway, engaging enthusiastically with therapies. This helped Jim to understand his emotions, cope in high-stress situations, learn effective communication and assertiveness skills.

Staff worked with Jim to develop a community transition plan, which focused on safety planning, medication management and life skills.

Jim today

Upon completion of his rehabilitation programme, Jim was discharged back into the community to live with his mother.

Equipped with his coping mechanisms and a renewed sense of purpose, he approached his reintegration with optimism and determination. He now engages in community support groups, continues his therapy sessions, and utilises the resources available to him.

*Name has been changed to protect his identity.
